

Evidence of testing

Tuesday, 19 February 2019 10:34 AM

Date: 19/2/19

What I tested: Checking whether answers to my quiz questions work. I set up my first question with the correct answer being b. Today was checking whether entering b would give a "Correct" message and others would give "Incorrect". Also, the current score should update.

Comment: Initially I couldn't get the score to update but then realised I needed to have score += 1 instead of score +1. Now it works fine.

Evidence:

```
-  
What is the capital of NZ?  
a) Auckland  
b) Wellington  
c) Christchurch  
b  
Correct!  
Score: 1
```
